01 — ABOUT

The Growth Architect

I'm a Senior Digital Marketing Manager based in Kolkata, actively relocating to Bengaluru. With over 12 years of experience spanning SEO, paid media, CRO, and AI-driven automation, I've helped B2B and B2C brands across India, APAC, US, UK, Australia, and GCC markets scale their digital presence significantly.

Currently at Floatingchip Internet Technologies (2018–Present), I lead a 16-member cross-functional team managing campaigns, performance optimization, and analytics reporting. I've managed annual ad budgets exceeding ₹30 Lakhs while consistently delivering 3× ROI.

> *"My approach combines technical SEO depth, data-first paid campaigns, and AI-augmented workflows to build growth engines that compound over time — not just short-term traffic spikes."*

I'm passionate about staying at the cutting edge — integrating tools like ChatGPT, Surfer SEO, Google AI Studio, and Perplexity into marketing workflows to scale output without scaling headcount.

02 — CORE EXPERTISE

What I Do Best

End-to-end digital growth strategy from search visibility to paid conversion — backed by 12+ years of hands-on execution.

SEO Strategy & Execution

Technical audits, on-page optimization, content strategy, and authority link building. Ranked 319+ keywords in top 3 positions for a single client.

`Technical SEO` `Link Building` `Content Strategy` `Schema Markup`

AI-Driven Marketing

Integrating AI tools into marketing workflows to scale content production, automate reporting, and improve campaign performance without proportional cost increases.

`ChatGPT` `Surfer SEO` `AI Studio` `Automation`

Conversion Rate Optimisation

Landing page redesigns, A/B testing frameworks, user journey mapping, and funnel restructuring to maximize lead volume at lower CPL.

`Landing Pages` `A/B Testing` `Funnels` `CRO`

Analytics & Reporting

GA4, Google Search Console, Looker Studio dashboards, and KPI reporting. Translating data into actionable growth recommendations for senior leadership.

`GA4` `Looker Studio` `GSC` `Tag Manager`

03 — AI SEARCH & AGENTIC AI

Built for the AI Search Era

Rankings are only half the picture. I optimise for being the answer, cited by AI engines, and I use agentic AI to scale the work behind it.

530	AI Mentions Tracked Across 4 Client Projects
392	Pages Cited in AI-Generated Answers
4	Niches: Translation, CV Writing, Data Annotation, CFA/FRM
3	Markets: USA, India, Australia

AEO

Answer Engine Optimization

Structuring pages so search engines and AI assistants can lift a direct, trustworthy answer from them.

- → Question-led content architecture mapped to search intent
- → Structured data and clear entity signals on key pages
- → Answer-ready formatting for snippets and AI answer boxes

`Answer-first content` `FAQ & HowTo schema` `Featured snippets` `People Also Ask`

GEO

Generative Engine Optimization

Earning mentions and citations inside ChatGPT, Gemini, Perplexity and Google AI Overviews, not just blue-link rankings.

- → Citation-worthy, authoritative pages built for LLM retrieval
- → Entity and knowledge-graph optimisation for brand recognition
- → Tracking AI mentions and cited pages per client

`AI Overviews` `ChatGPT` `Perplexity` `Gemini` `Entity SEO`

AGENTIC AI

AI Agents & Automated Workflows

Building AI agents and automations that take over repetitive SEO and content work so teams ship more without adding headcount.

- → Agent workflows for keyword research, topic intelligence and content briefs
- → Automated reporting and KPI dashboards
- → Human-in-the-loop QA so output stays accurate and on-brand

`Claude` `ChatGPT` `Google AI Studio` `NotebookLM` `Zapier`

04 — CASE STUDIES

Results That Speak

Real SEO campaigns. Real numbers — every metric is taken from analytics and search platform dashboards.

SEO · B2B/B2C

Translation Services — Keyword Dominance from Zero

Australian Translation Services | Language Services (Immigration, Legal, Academic)

Challenge: New-to-market brand with zero organic presence competing against established agencies and freelancer platforms in a niche technical space.

Strategy: Competitor gap analysis via Ahrefs → content strategy around informational + commercial intent keywords → crawlability and internal linking fixes → niche backlink outreach campaign.

319+	Keywords in Top 3
74K+	Monthly Organic Sessions
14.2M	Total Impressions
175	AI Mentions

SEO · B2C

CV Writing Service — Content-Led Traffic Growth

Resume/CV Writing Platform | B2C

Challenge: Content not indexed properly, generic keyword targeting, high bounce rate, poor mobile UX.

Strategy: Restructured site architecture and content taxonomy → implemented schema markup → created student-intent keyword-targeted landing pages → improved page speed and mobile UX.

50K+	Monthly Organic Sessions
15.3M	Total Impressions
↓ High	Bounce Rate Reduced

SEO · AEO/GEO

Data Annotation — Organic & AI Search Visibility

Data Annotation Services | Market: USA

Challenge: Build organic and AI-search visibility in the highly competitive US data annotation market, where established vendors dominate both Google results and AI-generated answers.

Strategy: Keyword and entity research around annotation services and use cases → service and solution pages built for search intent → structured data and internal linking → citation-ready content optimised for AEO/GEO so AI engines surface and cite the brand.

205	AI Mentions
140	Cited Pages

CFA/FRM Coaching — Organic & AI Search Visibility

CFA/FRM Exam Coaching | Market: India

Challenge: Capture exam-intent search demand for CFA and FRM prep in India, where coaching brands compete heavily on both rankings and AI answer visibility.

Strategy: Keyword mapping by exam, level and topic → course and resource pages aligned to student search intent → structured data and internal linking → authoritative, answer-first content built to earn AI mentions and page citations.
